23KN1A1239 — Nri Institute of Technology, Agiripalli

Experience

Data Analyst Intern, Infyntrek	Aug 2026 – Present (Remote)
- Performed data analysis using Excel, SQL, and Python on datasets of 5,000+ records to identify trends and generate data-driven business insights. - Built 2 automated dashboards and reporting workflows using Power BI and pivot tables, reducing manual reporting time by approximately 15%. - Cleaned and processed large datasets to improve data accuracy, reliability, and business intelligence reporting quality for stakeholder decision-making.	

Education

Nri Institute of Technology	2023–2027
B.Tech in Information Technology	
Sr Junior College	2021–2023
Intermediate, Andhra Pradesh	Percentage: 79.1
KC High School	2020–2021
SSC, Andhra Pradesh	GPA: 10.0

Projects

Vyaptiq IQ – Data-Driven Retail Intelligence Platform	2026
- Built a web-based retail intelligence platform that processes transactional datasets to compute KPIs (revenue, margin %, ARPU, promo rate) and detect anomalies using Z-score statistical analysis. - Designed a rule-based recommendation engine mapping analytical insights to prioritized business actions (pricing, promotions, marketing allocation), enabling data-driven revenue optimization; built end-to-end using React, Supabase (PostgreSQL), and Recharts.	
Customer Retention & Cohort Analytics Dashboard	2026
- Built an interactive dashboard analyzing 1,400+ customers to track repeat purchase rate (79.3%), average order value (Rs. 863), net delivered revenue, and average customer LTV across acquisition channels. - Performed RFM segmentation and monthly cohort retention analysis (M0–M5) to classify customers into Champions, Loyal Regulars, At-Risk, and Churned segments, identifying a 17-day mean repeat-purchase window. - Delivered 3 data-driven business recommendations (referral budget reallocation, automated CRM re-engagement, cross-sell strategy) to improve retention and lift average order value.	

Technical Skills

Languages: Python, C.
Frameworks: React.js, Bootstrap.
Web Technologies: HTML5, CSS3, REST APIs, Responsive Web Design.
Databases: MySQL.
Tools: Git, GitHub, VS Code, Eclipse.
AI/ML Exposure: Applied AI features (ATS scoring, resume analysis) in academic project work; Python (Pandas, NumPy, Matplotlib).
Data Analytics: Excel (Pivot Tables, VLOOKUP), SQL, Power BI, Data Visualization, Business Intelligence (BI) Reporting.
Business Analytics: KPI Tracking, Stakeholder Reporting, Forecasting, Data-Driven Decision Making, Requirement Gathering.
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability

Areas of Interest

Data Analytics, Business Analytics.

Achievements

- 1st Prize – Paper Presentation, MVR College of Engineering (2025)
- 1st Prize – Logo Design, Chalapathi Institute of Engineering & Technology (2025)
- 2nd Prize – Paper Presentation, PB Siddhartha College (2025)
- Published a Research Paper in a Taylor & Francis Indexed Journal (2025)
